

***AATM is a professional organization of educators dedicated to the improvement of mathematics education at all levels.***

**CONFERENCE DATE: Sept 17th—@ ASU Memorial Union**

**Conference Highlights**

**Algebra** — Each year in conjunction with the NCTM “Navigation Series”, the conference highlights a mathematical concept. This year’s topic is Algebra. The AATM executive board will lead discussions at each grade band. Participants will receive the NCTM Algebra activity book for the grade level. (limited number for early registrants.)

**Keynote Speaker** — This year we are privilege to have Nora Ramirez as our opening session speaker. Mrs. Ramirez has been an educator in the Arizona area for many years. She has dedicated the last 20 years to working with Arizona K-12 teachers, teacher leaders, and administrators in urban, suburban, and rural schools. Her work focuses on promoting equity, conceptual understanding of mathematics, teaching English Language Learners and making instructional decisions based on research and student thinking. Making math makes sense for all is her mission.

**Breakout Sessions** — We are planning for over 40 breakout sessions throughout the day. These sessions will be lead by our colleagues who are practicing teachers on a wide range of topics. The conference will include “Sponsored Sessions”. These sessions will include many of the current classroom materials from our publishers.

Register for the conference online at <http://www.aatm.org>

Teacher  
 Pre-registration..... \$100  
 On Site registration ..... \$120  
 College Student  
 Registration.....\$25

Conference Schedule:  
 7:00am ..... Registration  
 8:00 am—3:00 pm ..... Conference
